## Why It Matters

Improvement work doesn't stop when you leave your desk and now, neither does KaiNexus. With major mobile enhancements, you can capture, manage, and track your work from anywhere: the floor, the field, or in between meetings. Whether you're a frontline contributor or a strategic leader, the KaiNexus app ensures you're always connected to what matters most. With the KaiNexus Mobile App, you can:

- Empower frontline staff to document improvements in real time
- Give leaders visibility without needing a desktop
- Support rapid response and real-time decision-making
- Enable continuous improvement anytime, anywhere

## What's New in the Mobile App?

### Desktop Functionality on Your Mobile Device

What was once only available on the desktop is now available right at your fingertips. You can now access Boards, Item Lists, your User Profile, and even view your Badges directly from your mobile device. Bringing these features to the mobile app provides you with a more complete experience, allowing you to manage critical areas of your improvement work from anywhere.

Additionally, you can now resolve Items directly from your Create screen. This allows organizations to more easily capture, measure, and implement just-do-its or quick wins.

### Stronger Notification Displays

Stay on top of what matters with an enhanced notification section that now displays the number of notifications on the icon in the toolbar. This helps make sure you never miss an important update.

### Redesigned Navigation for Better Usability

We've revamped the navigation bar to make it easier than ever to find and use key features that were previously only available on the desktop. The improved design ensures you can easily navigate through the app and access essential areas with just a few taps.

### Enhanced Item Management On-the-Go

Working with Items has never been more powerful on mobile. You can now copy, convert, and add nested Items, as well as add Weighted Scores and Standard Work Items. But wait, there's more! You can also use our AI-powered similar items search directly within the app to streamline your decision-making and collaboration.
